In Year 2, we have completed an online safety quiz in teams. It helped us to think about ways we can keep ourselves safe and happy whilst using the internet. Here are some of our ideas.

"We can tell our parents when we have seen something that has upset us."

"You must never enter your personal details online. For example your address, your password, your full name and your phone number."

"If you see something that is sad or bad you should always tell your mum and dad they will not be cross."

"Cyber bullying is bullying online- **DO NOT DO IT!**"

"Never keep secrets online."

"Never talk or message anyone online who you do not know. They are strangers, just like strangers in the street. Just ignore them and tell an adult you trust."

"If someone is mean to you online tell a trusted adult and do not be mean back."

"We can tell our parents when we have seen something that has upset us on the internet. They won't be cross because it is not our fault."

"You should ask a grown up if you want to go online or try something new."

"Be careful of adverts that are not real or that want your personal information."
