Minecraft paedophile Adam Isaac groomed boys online

3 20 January 2017 | South East Wales

een

A man who groomed young boy. jailed for two years and eight months.

Adam Isaac, 23, from Merthyr Tydfil, previously admitted eight sexual offences against children.

Merthyr Tydfil Crown Court heard he targeted two boys, aged 12 and 14, and asked them to send intimate photos of themselves.

Judge Richard Twomlow QC said: "This predatory behaviour is a worry and a concern to parents."

Send this instead

Send This Instead 🖸

The Send This Instead app has been developed to help children combat sexting from peers. The app gives a range of optional images with humorous messages so that children can send these as a response to sexting, putting them back in control.

Made by ChildLine, Zipit aims to help teenagers deal with difficult sexting and flirting situations. The app offers humorous comebacks, advice, and aims to help teenagers stay in control of flirting when chatting.

The more pretty you are, the more followers you get on Instagram. Normally, people don't get likes if you're plain. You need make-up to get likes.

(9-10 year old girls, Bristol)

SUMMARY OF KEY POINTS

Apps and portable devices meant parents and children were not always sure when children were online.

Going online now happens on a range of devices, including tablets, phones and games consoles, and often through apps and games rather than via a browser.

'My favourite game is Farmville. I play this one the most. These are all my friends who I help and who help me build my farm'.

Lily, 8

National Geographic and Wildworks

Assess – What are the risks with this?

- This app lets me
- Set up a profile
- OChat with friends
- OSend text / pictures / Video
- Chat with random people
- OUses GPS to allow chat with people near me
- Move into private chat

Chat instantly and meet new friends on Meow

Highlighted in The Times Newspaper May 2017

The new teen craze parents need to know about

A website where teenagers can leave anonymous feedback about one another has soared in popularity in the past month. Experts are worried that it is a licence for online bullying

It has 30 million users, trades in personal feedback — good and bad — and people can write on it whatever they like because they remain anonymous. Welcome to Sayat.me, the app you haven't heard of yet, but your teenage child certainly will have — because they are probably on it.

"We use it to see if people like us or not." a 14 year old London school girl says matter of factly.

"...found her daughter Emily in her bedroom crying over her smartphone. The 13 year old had received a string of messages telling her she was ugly, two-faced and should kill herself. She had been on Sayat for three weeks."

Warnings Issued Over Children's Online Game Roblox

Warnings have been issued by parents about the popular online game Roblox after their children were sent explicit messages from adults.

Roblox is available as an app and online game via their website, and there is a chat and messaging system that parents may not be aware of,

How to play safely:

- Make sure that the account is set so that your child's user profile is for an 'under 13 year old', so that any settings changes will need to be authorised by a parent via an email link sent to their account.
- O Chat mode is set to off by default on all profiles, with the 'Privacy Mode On' automatically set, if chat has been turned on, switch it back off via account settings.
- If you delete the app and your child has internet access they can still play on the website is they have an account set up, so you will need to check the settings on that too.

ADVICE

You are here: Home > Advice > Apps Guide

parents' guide to apps

Apps for meeting new people that might create risks

Many of these apps forge a link between children, teens, and adults in the virtual world. Whilst some of the apps don't have age restrictions, those that do could be ignored by young people. Worryingly these apps might also bridge the gap between virtual and real world.

In this section you'll also find links to they may pose.

The app version functionality as interactions bet has to log in an computerised) of content, but ch talking to.

Apps to help young people overcome chatting problems

Send This Instead 🖸

The Send This Instead app has been developed to help children combat sexting from peers. The app gives a range of optional images with humorous messages so that children can send these as a response to sexting, putting them back in control.

Zipit C

Made by ChildLine, Zipit aims to help teenagers deal with difficult sexting and flirting situations. The app offers humorous comebacks, advice, and aims to help teenagers stay in control of flirting when chatting.

GoBubble - created by eCadets - allows children to take advantage of the best bits of social media without any of the negative aspects.

With GoBubble C children can chat online with school friends, share jokes, pictures or videos and learn about different cultures by making new friends of the same age from around the world in safer online environment. The main difference is that the child's school is placed at the centre of their social media network and teachers are able to monitor activity.

Snap maps enable a user, if you and a friend follow one another, to share their locations with each other so you can see where they are and what's going on around them.

As this new feature shows your precise location pinpoint on a map - we would encourage users not to share their location, especially with people they don't know in person.

Location settings

There are three location settings to chose from:

- Ghost Mode: you are the only person who can see your location on the map. Within Ghost Mode you can still see the locations of your friends but they will be unable to see you.
- My Friends: means that all of your contacts on Snapchat can see your location.
- Select Friends: allows users to look through their friend list and then decide which of their friends they want to be able to view their location.

Snap maps

Initial information is from 2015 but they add updates e.g. this information about Snap maps.

https://www.internetmatters.org/hub/guidance/snapchat-safety-a-how-to-guide-for-parents/

Help kids keep things private on social If your child is using social networking sites to chat to friends and family or share their latest selfie, take a look at our list of great social media guides to get you up to speed on the most popular platforms and help them set the right privacy settings. social media and messaging apps There are plenty of ways to keep your child safe on their favourite social networks, see how with these quides. O Instagram Snapchat ■ Facebook WhatsApp Wishbone OoVoo YouTube Yellow Live streaming apps Live streaming has captured the imagination of teens around the world but also introduced a number of risks they could be exposed to. Learn

Talk

Deal

1. Learn about e-safety

Be aware of the technology children are using and at what age

Understand the issues and facts surrounding e-safety

2. Talk about e-safety

Take time to talk to your children about e-safety

Share your experiences with other parents and teachers

3. Deal with e-safety

Understand and take action to deal with e-safety

Use the tools and controls provided to help protect children online

Dealing with inappropriate CONTENT

4.7m

URL's showing pornographic content

More than 12% of the internet

11yrs

Average age to first view porn online 1/3

of children have seen explicit images by age of 10

Dealing with inappropriate CONTENT

What to talk about

- They can come to you if they see anything that upsets them
- If they have seen pornography...that it presents an unrealistic image of sex and relationships
- The importance of respect for each other and the meaning of consent

Top tips / tools to use

- Parental controls on home broadband
- Content lock on mobile networks
- Safe search on Google (& other browsers) & YouTube; child –friendly search engines

Dealing with inappropriate CONTACT

48%

of secondary school children have talked to strangers on social media 48%

of 11 year olds have a social media profile

Dealing with inappropriate CONTACT

What to talk about

- Sometimes people hide behind fake profiles for dishonest reasons
- Agree how they will respond to requests from people they don't know in real life
- Never ever to meet up with anyone they don't know in real life

Top tips / tools to use

- Set up safe social media profiles that don't share personal information
- Turn off geo location settings on devices
- Use the strongest privacy settings on social media
- Learn how to report / block/ mute

Dealing with inappropriate CONDUCT

25%

of children will experience cyberbullying 50%

of children say someone has been nasty online

Dealing with inappropriate CONDUCT

What to talk about

- Talk to a trusted adult if they experience anything upsetting online
- Think carefully about sharing images of others
- Be responsible online, remembering they are creating their own digital footprint

Top tips / tools to use

- Report inappropriate posts/content to the social media providers
- Think carefully about using monitoring apps that identify inappropriate behaviour

Controlling tech time

And there are tactics you can put in place to help manage their screen time....

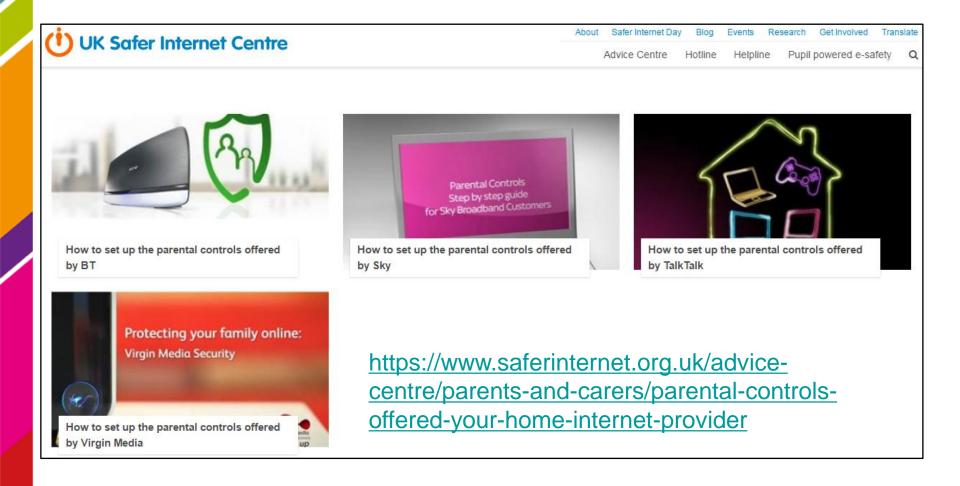

- Set a good example
- Talk together about the time spent online
- Agree on appropriate length of time they can use their device
- Get the whole family to unplug & create screen free zones
- Use technology / apps to help manage screen time e.g. Forest App

Parental Controls

Parental Controls on mobile phones
